WITH PATINA SEF IS OFFERING A NEW WAY OF PROCESSING

FLOCK SUBSTRATES THAT WILL SURPRISE OUR CUSTOMERS

AND STIMULATE IMAGINATION AND CREATIVITY.

DISCOVER AND FEEL THIS NEW GENERATION PLAIN VELVET MATERIAL.

Whether the needs are traditional or contemporary, formal or casual, its new fiber gives to PATINA extra bright colors, a high resistance to manipulation and scratching and a very warm feel.

Available with our best seller «SG» paper substrate PATINA can be made with a large variety of substrates (PVC, cardboard...).

Branding can be made through:
- hot stamping
- Embossing
- Laser embossing

PATINA fills a need within the packaging community providing high fashion, well priced next generation flock material for demanding customers.

This beautifully styled «suede» product encompass every design theme and requirement.
